4. [] stated that the National Committee for Free Albania, wished to have guidance on appropriate Congressmen and Senators to whom they should send the Albania News Bulletin. I pointed out that the majority of Congressmen would have no time to read such a publication, and that as it was controversial, it might create an incident which would lead to Congressional investigation of the National Committee for Free Albania. This appeared to be an unwarranted risk in an election year. I, therefore, recommended that they not send the publication to members of Congress. (2105 K Bldg; []).
